

Project Deliverables (Reorder By Complexity Without Dependency)

Thursday, December 4, 2025 1:44 PM

Note2Self

Keep Abstract/Ontological/Epistemological To Top (Used to support claims on projects/frameworks)
Move Writers Frameworks To Top (Study forms of writing before publishing)
Move Software To Top-Mid (Portfolio Strategist)
Move Royal Polyarchy To Top-Mid
Move Philosophical, Psychological, Financial To Middle
Move Mathematics To Middle (Foundational Mathematics To Support Claim, Then Build Upon it)
Move Physics To Middle/Low and Independently By Testable Experiments for Claims (Revisiting old experiments, Then arguments of alternative interpretation)
Move Engineering/Future Technologies To Bottom

★ A.I.C. MASTER CANON ROADMAP (FULLY MERGED, MAX PUBLICATION)
LAYER 1 — PURE LOGIC (ROOT)

1. Theoretical Reasoning Framework (TRF)

Reason

Universal inference engine. All math, physics, AI, accusations, proofs, and system reasoning depend on TRF.

Next Tasks

- Finalize operator algebra (AND / OR / EXCEPT / RESONATE / COLLAPSE / etc.)
- Define truth-graphs and proof paths
- Encode deduction, induction, abduction, and coherence rules
- Build 10–15 example proofs across domains (math, physics, finance, ethics)

Deliverables

- TRF v1.0 paper
- Operator tables + semantics
- Example proof compendium

Publication Targets

- Journals: *Journal of Symbolic Logic*, *Synthese*, *Review of Symbolic Logic*, *Journal of Applied Logic*
- Conferences: ACM SIGLOG, ESSLLI
- Archives: arXiv (*math.LO*, *cs.LO*)
- Institutions: Association for Symbolic Logic, philosophy of logic groups

2. AIC / Daemon Framework (Echo, Oracle, Critic, Archivist)

Reason

Meta-coherence layer supervising reasoning, catching contradictions, tracking drift. Backbone of your “thinking machine.”

Next Tasks

- Define roles & operators for each daemon
- Specify AIC arbitration rules & constraints matrix
- Integrate AIC with TRF (how it evaluates proofs & structures)
- Design output formats for reports and annotations

Deliverables

- AIC Protocol v1.0
- Architecture diagrams
- Sample coherence reports over TRF / math / physics drafts

Publication Targets

- Journals: *JAIR*, *AI Magazine*, *Artificial Intelligence*
- Conferences: NeurIPS (interpretability/LLM reasoning), ICLR, AAAI
- Archives: arXiv (*cs.AI*, *cs.MA*)
- Institutions: AAAI, NeurIPS Foundation, AI safety/interpretability labs

3. Symbolic Phase Entropy

Reason

Quantifies stability/drift of symbolic systems: equations, ontologies, writing systems, code, daemons.

Next Tasks

- Define entropy functional over symbol distributions/sequences
- Classify stability regimes (stable / metastable / unstable)
- Test on three domains: math notation, physics framework, writing framework

Deliverables

- Symbolic Phase Entropy v1.0 paper
- Worked case studies

Publication Targets

- Journals: *Entropy (MDPI)*, *Information Sciences*, *IEEE Transactions on Information Theory*
- Archives: arXiv (*cs.IT*, *cs.LO*)

4. Ontological–Epistemological Matrix

Reason

Global grid for classifying all 47 works: Real / Emergent / Symbolic / Hypothetical × Known / Conjectured / Underdetermined / Undecidable.

Next Tasks

- Lock in axes and definitions
- Classify every framework, equation set, technology, and canon volume
- Note dependency paths directly on the matrix

Deliverables

- Onto–Ep Matrix v1.0 paper
- Master table of all works mapped

Publication Targets

- Journals: *Philosophy of Science*, *Synthese*, *Studies in History and Philosophy of Modern Physics*
- Archives: arXiv (*physics.hist-ph*, *physics.gen-ph*)

5. Mathematical Phenomena Interpretation System (MPIS)

Reason

Systematic way to interpret mathematical “behaviors” (divergence, oscillation, phase-locking, singularities) via TRF + entropy.

Next Tasks

- Build taxonomy of mathematical phenomena
- Map each to TRF/entropy interpretations
- Demonstrate on Synchronetic Math and Reflexive Arithmetic examples

Deliverables

- MPIS v1.0 paper
- Example catalogue

Publication Targets

- Journals: *Journal of Mathematical Behavior*, *Mathematical Structures in Computer Science*
- Archives: arXiv (*math.GM*, *math.HO*)

LAYER 2 — AXIOMATIC SYMBOLIC MATHEMATICS

6. Symbolic Axiom Set (Five Foundational Equations)

Reason

Defines the fundamental symbolic “physics” of your math universe: $1^2 + i^2 = 0$, $e^{i\pi} + 1 = 0$, $\phi^2 = \phi + 1$, $|1 + i| = \sqrt{2}$, $\int e^{-x^2} dx = \sqrt{\pi}$.

Next Tasks

- Formalize them as axioms in a symbolic system
- Derive constant relations and invariants
- Show how standard math structures arise from them

Deliverables

- Symbolic Axioms & Unified Constant System paper

Publication Targets

- Journals: *Foundations of Physics*, *Studies in History and Philosophy of Modern Physics*
- Archives: arXiv (*math-ph*)

7. Synchronetic Mathematics

Reason

Core formalism for resonance, pattern-locking, and synchrony — primary mathematical substrate for your physics.

Next Tasks

- Define synchronetic operators and resonance laws
- Characterize locked, beating, amplifying, and cancelling patterns
- Relate to geometric/topological objects

Deliverables

- Synchronetic Mathematics v1.0 paper

Publication Targets

- Journals: *Communications in Mathematical Physics*, *Annals of Mathematics* (stretch)
- Archives: arXiv (*math-ph*)

8. Reflexive Arithmetic Universe

Reason

Self-referential arithmetic underpinning recursion, self-reference in TRF, and aspects of STUFF.

Next Tasks

- Define reflexive numbers and operations
- Prove fixed-point and self-reference theorems

- Connect to Symbolic Phase Entropy and Tarski-like limits

Deliverables

- Reflexive Arithmetic paper

Publication Targets

- Journals: *Annals of Pure and Applied Logic*, *Journal of Symbolic Logic*
- Archives: arXiv (*math.LO*)

9. Archetypal Mathematics

Reason

Mathematical formalization of “archetypes” (center/edge/threshold/dual/etc.), bridging psyche, narrative, and structure.

Next Tasks

- Define archetypal primitives and relations
- Build transformation algebra
- Show mapping from motifs + psyche structures to archetypal operations

Deliverables

- Archetypal Mathematics paper

Publication Targets

- Journals: *Cognitive Systems Research*, *Journal of Mathematical Psychology*
- Archives: arXiv (*math.GM*, *q-bio.NC* for cognitive mapping)

10. Arithmorphics Mathematics

Reason

Captures morphic transformations and structural changes in number/form — key for evolution of symbolic systems.

Next Tasks

- Define morphic numbers and morphic operators
- Show relationship to Synchronetic and Reflexive frameworks

Deliverables

- Arithmorphics primer paper

Publication Targets

- Journals: *Journal of Mathematical Analysis and Applications*
- Archives: arXiv (*math.GM*)

11. Triadic Mathematics

Reason

Tri-valued logic/math underpinning your collapse interpretation and quantum logic.

Next Tasks

- Define triadic truth values and operators
- Construct triune symmetry groups
- Apply to simple quantum-like toy models

Deliverables

- Triadic Mathematics & Quantum Logic paper

Publication Targets

- Journals: *Foundations of Physics*, *Quantum*
- Archives: arXiv (*quant-ph*, *math.LO*)

12. Synchronetic Coordinate System

Reason

Geometric realization of synchronetic math: coordinates as resonance states instead of simple metric distances.

Next Tasks

- Define coordinate tuples (resonance-based)
- Build transform rules between standard (x,y,z,t) and synchronetic coordinates
- Provide physical interpretations

Deliverables

- Synchronetic Coordinate Systems paper

Publication Targets

- Journals: *Journal of Mathematical Physics*
- Archives: arXiv (*math-ph*, *gr-qc*)

13. Unknown Equations Atlas

Reason

Living inventory of “intended” but not-yet-derived equations across your canon — ensures continuity and future growth.

Next Tasks

- Catalogue conceptual gaps by domain (math, physics, engineering)
- Assign tentative symbols, roles, and dependencies
- Version-control it as you derive new equations

Deliverables

Deliverables

- Atlas of Unknown Equations (v1.0 internal whitepaper + evolving arXiv series)

Publication Targets

- Archives: arXiv preprints as a series (“Atlas of Undiscovered Equations, Part n”)
- Platforms: GitBook, internal dev wiki

LAYER 3 — FOUNDATIONAL PHYSICS

14. Densiton–Density Continuum

Reason

Primary ontology: densitons as fundamental “substance” describing density/field beyond standard matter/energy.

Next Tasks

- Define densiton field equations and units
- Relate densitons to energy, mass, and synchronetic structures
- Compare with GR’s stress-energy tensor

Deliverables

- Densiton Physics paper

Publication Targets

- Journals: *Physical Review D*, *Classical and Quantum Gravity*
- Archives: arXiv (*gr-qc*, *hep-th*)

15. Quanta of Space

Reason

Discretized space structure on which densitons live; necessary for Relational Continuum & STUFF.

Next Tasks

- Define fundamental spatial quanta and adjacency rules
- Map densiton fields onto quantum graphs/lattices
- Examine continuum limit

Deliverables

- Quanta of Space paper

Publication Targets

- Journals: *Classical and Quantum Gravity*, *Journal of High Energy Physics*
- Archives: arXiv (*gr-qc*, *hep-th*)

16. Interference Collapse Interpretation

Reason

Quantum measurement interpretation using Triadic Math + synchronetic structures.

Next Tasks

- Define collapse operator and triadic measurement rules
- Model canonical experiments (double-slit, etc.)
- Compare with Copenhagen, Many-Worlds, etc.

Deliverables

- Interference Collapse Interpretation paper

Publication Targets

- Journals: *Foundations of Physics*, *Physical Review Research*
- Archives: arXiv (*quant-ph*)

17. Desitron (Particle Hypothesis)

Reason

Hypothetical particle emerging from densiton dynamics; signature of your theory’s novelty.

Next Tasks

- Define quantum numbers and interaction rules
- Derive possible experimental signatures
- Position within extended Standard Model context

Deliverables

- Desitron Hypothesis paper

Publication Targets

- Journals: *Physics Letters B*, *Europhysics Letters*
- Archives: arXiv (*hep-ph*)

18. Time Theory

Reason

Coherent, densiton-based theory of time; needed before causality matrices and continuum.

Next Tasks

- Distinguish fundamental vs emergent time types
- Express time as gradient/ordering of densiton configurations

- Link to Synchronetic Math and collapse

Deliverables

- Time Theory paper

Publication Targets

- Journals: *Foundations of Physics*, *Studies in the History and Philosophy of Modern Physics*
- Archives: arXiv (*gen-ph*)

19. Time–Causality Matrix

Reason

Encodes relationship between events, states, and causal flows; vital for Trader Exchange and narrative causality.

Next Tasks

- Define matrix structures for branching/merging/feedback
- Connect to TRF inference rules
- Provide examples for physics and financial event streams

Deliverables

- Time–Causality Matrix paper

Publication Targets

- Journals: *Journal of Applied Logic, Information and Computation*
- Archives: arXiv (*math-ph*, *cs.LO*)

20. Relational Continuum (Time $\rightarrow$ Space)

Reason

Formalizes hypothesis that time gradients generate spatial extension; key cosmological step.

Next Tasks

- Model time-gradients turning into spatial separation in densiton fields
- Relate to Quanta of Space and Synchronetic coordinates

Deliverables

- Relational Continuum paper

Publication Targets

- Journals: *Universe (MDPI)*, *General Relativity and Gravitation*
- Archives: arXiv (*gr-qc*)

21. Resonant Universe Hypothesis

Reason

Macro-level model of universe as resonance structure: geometry $\rightarrow$ energy $\rightarrow$ vibration $\rightarrow$ information.

Next Tasks

- Use Synchronetic Math to describe large-scale resonance modes
- Integrate with densiton and Relational Continuum models
- Identify possible observational signatures

Deliverables

- Resonant Universe Hypothesis paper

Publication Targets

- Journals: *Progress of Theoretical and Experimental Physics*
- Archives: arXiv (*hep-th*, *astro-ph.CO*)

22. Resonant Collapse Framework (Space Holes / Time Holes)

Reason

Extends GR with resonance, describing spacetime ruptures as space-/time-holes.

Next Tasks

- Modify Einstein Field Equations with resonance/densiton terms
- Define conditions for space-hole/time-hole formation
- Model behavior near these structures

Deliverables

- Resonant Collapse paper

Publication Targets

- Journals: *Physical Review D*, *Journal of Cosmology and Astroparticle Physics*
- Archives: arXiv (*gr-qc*, *hep-th*)

23. Negative Mass / Negative Frequency Framework

Reason

Completes your energy-momentum and resonance spectrum; places “negative sectors” on solid footing.

Next Tasks

- Extend energy-momentum relations
- Explore stability and allowed regimes
- Connect to space-/time-hole physics

Deliverables

- Negative Mass & Frequency paper

Publication Targets

- Journals: *Annals of Physics*, *Physics Letters A*
- Archives: arXiv (*hep-th*)

24. C-Bridge / E_total / Force_force / Mass Equations

Reason

Your generalized equation set tying together c, energy, mass, force under densiton/resonant ontology.

Next Tasks

- Final dimensional analysis for each equation
- Provide worked examples where they outperform classical analogs
- Integrate with previous physics frameworks

Deliverables

- C-Bridge & Generalized Energy Relations paper

Publication Targets

- Journals: *Foundations of Physics*, *Physica A*
- Archives: arXiv (*hep-th*, *gr-qc*)

25. Diverse Forms of Matter & Energy

Reason

Taxonomy of all known + proposed forms: standard, dark, densiton-based, negative mass, resonant forms, etc.

Next Tasks

- Formal definition/criteria of each type
- Place each into Onto–Ep Matrix
- Summarize physical implications

Deliverables

- Taxonomy of Matter & Energy paper

Publication Targets

- Journals: *Universe (MDPI)*, *Astroparticle Physics*
- Archives: arXiv (*hep-th*, *astro-ph.CO*)

26. Speed-of-Light Perspective

Reason

Rewrites physics from light's null frame; ties into STUFF and Relational Continuum.

Next Tasks

- Define null-frame transformation laws
- Reformulate key laws as seen by light
- Relate to your other frameworks

Deliverables

- Speed-of-Light Perspective paper

Publication Targets

- Journals: *Foundations of Physics*
- Archives: arXiv (*gen-ph*, *gr-qc*)

27. STUFF (Symbolic Toroidal Unified Field Framework)

Reason

Grand unification: complexified toroidal T^4 with internal cycles hosting your fields and symbolic dynamics.

Next Tasks

- Finalize T^4 metric and internal coordinates
- Embed densiton fields, resonance, and time-space relations
- Show how Standard Model and gravity can be approximated

Deliverables

- STUFF v1.0 paper

Publication Targets

- Journals: *Physics of the Dark Universe*, *Journal of High Energy Physics*, *Foundations of Physics*
- Archives: arXiv (*hep-th*, *gr-qc*)

LAYER 4 — ENGINEERING & ADVANCED TECHNOLOGIES

28. Engineer Disciplines (Density, Entanglement, Resonant, etc.)

Reason

Defines the applied branches of your physics; professionalizes your tech canon.

Next Tasks

- Enumerate disciplines and scope (Density Engineering, Entanglement Engineering, etc.)
- Map each to underlying equations in densiton/resonant frameworks

map each to underlying equations in densiton/resonant frameworks
Deliverables

- Engineer Disciplines Manual v1.0

Publication Targets

- Journals: *IEEE Systems Journal*
- Conferences: Systems engineering, applied physics forums

29. Abstract Architecture

Reason

General system-design framework using TRF + entropy + physics analogies.

Next Tasks

- Extract architectural principles from TRF + Symbolic Entropy
- Define architecture layers and failure modes

Deliverables

- Abstract Architecture v1.0 paper

Publication Targets

- Journals: *Systems Engineering*, *IEEE Software (architecture column)*

30. Synchronetic Navigation Systems

Reason

Applies synchronetic coordinates + Time–Causality to guidance/control.

Next Tasks

- Formulate navigation equations in synchronetic coordinates
- Design control algorithms exploiting resonance alignment

Deliverables

- Synchronetic Navigation & Control Systems paper

Publication Targets

- Journals: *Journal of Guidance, Control, and Dynamics*
- Conferences: AIAA guidance and control

31. Artificial Horizon Satellites

Reason

Densiton/resonant-stabilized orbital platforms as practical demonstration.

Next Tasks

- Conceptual mission profiles
- Stabilization/control schemes using resonance physics

Deliverables

- Artificial Horizon Satellite whitepaper

Publication Targets

- Journals: *Acta Astronautica*, *Journal of Spacecraft and Rockets*
- Agencies: Concept notes for NASA/ESA

32. Five-Stage Resonant Rocket

Reason

High-level propulsion architecture using multi-stage physical principles, including resonant/densiton effects.

Next Tasks

- Define 5 stages and their physical regimes
- Preliminary energy budgets and performance envelopes

Deliverables

- Five-Stage Resonant Propulsion paper

Publication Targets

- Journals: *Journal of Spacecraft and Rockets*
- Conferences: AIAA propulsion meetings

33. Mach# Systems

Reason

High-speed flight systems accounting for densiton gradients and resonant aerodynamics.

Next Tasks

- Develop models for resonance-driven shock dynamics
- Explore control strategies at high Mach

Deliverables

- Mach# Systems paper

Publication Targets

- Journals: *AIAA Journal*, *Journal of Fluid Mechanics*

34. Next Generation Technologies Roadmap

Reason

Top-level blueprint for all future tech derived from your physics.

Next Tasks

- Catalogue main tech categories (energy, computation, transport, sensing, etc.)
- Map each to supporting physics/engineering layers

Deliverables

- Next Gen Technologies Roadmap document

Publication Targets

- Journals: *IEEE Transactions on Emerging Topics in Computing*
- Whitepapers: DARPA, NASA, research consortia
- Book: “Resonant Technologies: A Future Engineering Manifesto”

LAYER 5 — FINTECH / SOFTWARE / ECONOMIC ENGINES

35. Portfolio Strategist MVP

Reason

High-probability early win: practical product, direct revenue, proves execution.

Next Tasks

- Implement core budgeting logic (bills/debt/needs/wants, savings, remains)
- Set up basic graphs and simple rules engine

Deliverables

- Deployed MVP web app
- Initial documentation

Publication Targets

- Platforms: GitHub, Product Hunt, personal site
- Journals: *Journal of Financial Data Science* (architecture article)
- Accelerators: YC Startup School, fintech incubators

36. Document OCR Platform (Django)

Reason

Applied ML/engineering credit; potential B2B income.

Next Tasks

- End-to-end pipeline (upload → OCR → field extraction → storage)
- Basic validation rules using TRF-style consistency checks

Deliverables

- Deployed OCR micro-SaaS
- API & technical docs

Publication Targets

- Journals: *IEEE Access*, *Pattern Recognition Letters*
- Archives: arXiv (*cs.CV*)
- Platforms: GitHub, demo site

37. Portfolio Strategist v1.0 (Paid Tier)

Reason

Converts MVP into actual income engine and anchor product.

Next Tasks

- Advanced analytics and reports
- Premium features (AI financial fellow, equation library, advanced scenarios)
- Payment integration and access tiers

Deliverables

- Paid SaaS release
- Marketing site and onboarding funnels

Publication Targets

- Platform: App directories, fintech blogs, Product Hunt (v1 relaunch)
- Industry: CFA Institute fintech showcases

38. Trader Exchange MVP

Reason

Second major engine; leverages Time–Causality Matrix for markets.

Next Tasks

- Architecture for order-matching & event streaming
- Risk and position engine based on TC Matrix
- Prototype UI for strategy testing

Deliverables

- Trader Exchange MVP (sim or testnet)
- Whitepaper

manuscript

Publication Targets

- Journals: *Quantitative Finance*, *Algorithmic Finance*
- Conferences: quant/fintech events
- Accelerators: fintech incubators, crypto exchanges' ecosystem grants

39. Financial Frameworks Book

Reason

Formalizes your personal finance strategies and connects public persona → products.

Next Tasks

- Structure book (career ladders, savings, real estate ladders, case studies)
- Integrate Portfolio Strategist workflows in narrative examples

Deliverables

- Book manuscript: *The Resonant Wealth Framework* (or similar)
- Worksheets & calculators

Publication Targets

- Platforms: Amazon Kindle, Audible
- Traditional: pitches to Penguin Random House / HarperCollins (finance imprint)
- Marketing: podcasts, personal finance YouTube/IG collabs

LAYER 6 — WRITING / PSYCHE / VOICE / NARRATIVE SYSTEMS

40. Writing Measurement Framework

Reason

Gives you a distinctive, rigorous voice in writing craft; supports future narrative canon.

Next Tasks

- Final definitions of Form / Pace / Patterns / Expression / Interpretation
- Annotate sample texts from multiple genres

Deliverables

- WMF v1.0 guide
- Example library

Publication Targets

- Journals: *Journal of Writing Research*, *Computers & Composition*
- Platforms: Medium/Substack series, eventual craft book
- Communities: writing subreddits, craft forums

41. Motif Taxonomy Atlas

Reason

Deep motif resource across thriller, mystery, drama, conflict, closure, etc.; highly monetizable as a writer tool.

Next Tasks

- Finalize all 50x motif sets with definitions + examples
- Cross-link motifs with WMF dimensions (e.g., which motifs amplify Pace/Pattern)

Deliverables

- Motif Atlas v1.0 (tables + commentary)

Publication Targets

- Platforms: Gumroad, Patreon (premium resource), personal store
- Communities: screenwriting/writing blogs, StoryGrid-like communities
- Potential: integration into future writing software

42. Podcast: *The Resonance Paradox*

Reason

Public-facing voice tying physics, writing, psyche, and finance together; audience funnel into your entire canon.

Next Tasks

- Season 1 topics (logic, resonance, time, writing, wealth, mythos)
- Record and edit pilot
- Create intro/outro branding

Deliverables

- Pilot episode
- Season 1 outline (10–12 episodes)

Publication Targets

- Platforms: Spotify, Apple Podcasts, YouTube
- Cross-promo: Substack transcripts, Twitter/X thread recaps
- Long-term: guest appearances on bigger shows (Lex Fridman, Sean Carroll, finance pods)

43. Psyche Spatial Architecture

Reason

Reason

Formal psyche topology; connects Archetypal Math, motifs, and Royal Polyarchy inner life.

Next Tasks

- Define mental spaces, realms, transitions, “boundaries”
- Tie to archetypal transforms and symbolic entropy

Deliverables

- *Psyche Spatial Architecture* manuscript
- Diagrams of psyche geometry

Publication Targets

- Journals: *Journal of Consciousness Studies*, *Cognitive Systems Research*
- Book: theory/psychology imprint (Routledge, Springer)
- Popular: essays in psychology-and-philosophy outlets

LAYER 7 — WORLD-ARCHITECTURE & COSMOLOGY (ROYAL POLYARCHY)

44. Royal Polyarchy Constitution & Government

Reason

Political-structural backbone of your mythos; governance architecture for the cosmology.

Next Tasks

- Final ministries, houses, law categories, succession rules
- Model time-evolution with Time–Causality Matrix

Deliverables

- Royal Polyarchy Constitution Volume
- Institutional charts

Publication Targets

- Platforms: lore book, worldbuilding site, World Anvil
- Extras: physical artbook/collector editions via Kickstarter

45. Royal Polyarchy Dynasties & Atlas

Reason

Historical depth: genealogies, eras, dynastic shifts aligned with your cosmological epochs.

Next Tasks

- Construct family trees and timelines
- Map dynastic arcs to cosmic/physics epochs

Deliverables

- Dynastic Atlas (maps + timelines)

Publication Targets

- Platforms: illustrated print + digital atlas
- Transmedia: reference bible for adaptations (anime, novels, games)

46. Royal Polyarchy Encyclopedia (Blueprint/Cipher/Entities)

Reason

Master reference text: artifacts, ciphers, entities, sigils, tech, myth.

Next Tasks

- Define all entity classes and items
- Encode cipher systems and symbol sets
- Tie entries back to physics & math layers (where appropriate)

Deliverables

- Encyclopedia vol. 1: Blueprint & Entities
- Cipher appendix

Publication Targets

- Format: large-format hardcover, digital compendium
- Platforms: lore wiki, custom site; possible NFT/collectible tie-ins

47. Royal Polyarchy Cosmology & *Volumes of the Cosmos*

Reason

Ultimate synthesis: your physics, math, psyche, and politics expressed in narrative cosmology.

Next Tasks

- Map Nova Gaia → Omniverse with STUFF + Resonant Universe baked in
- Divide into major book cycles/volumes
- Define key arcs and anchor characters/dynasties

Deliverables

- *Volumes of the Cosmos* series outline
- First volume manuscript
- Canon cosmology map

Publication Targets

- Traditional: sci-fi/fantasy imprints (Tor, Orbit, Gollancz)
- Indie: Amazon KDP, audiobook (Audible)
- Transmedia: pitches for anime/animated series, games, visual novels, etc.

Summary

- Order: strictly dependency-true (logic → math → physics → engineering → fintech/software → writing/psyche → worldbuilding).
- Each of 47 works: has Reason → Next Tasks → Deliverables → Maxed Publication Targets.
- No framework appears before the one that makes it *provable*.
- Nothing is left without a home for publication.

If you want, next I can:

- Slice this into a 3-year / 5-year / 10-year execution timeline, or
- Pull out a “Top 10 to finish first” list that preserves dependencies but front-loads momentum.
